TO: HIRING TEAM

RE: SENIOR DESIGN LEADERSHIP

## Dear Hiring Manager,

I have built my career on one conviction: great design is a strategic multiplier. For over fifteen years I have designed and led work that connects people to complex technology — not decoration, but architecture that moves a business.

My perspective is deliberately unsiloed. I have led teams and delivered hands-on work across UI/UX and customer-experience strategy, brand identity, graphic design and 3D architectural visualization — for enterprises in Pakistan, the UAE and international remote engagements. That range lets me hold one consistent, world-class vision across every touchpoint: product, marketing and physical space.

Vision needs disciplined execution. I have deliberately fortified my craft with enterprise fluency — SAP Fiori/UI5, SAP Cloud ALM, Agile delivery — and a generative-AI-native practice, with the CAPM® credential in progress. I am the designer who can articulate the visionary 'what' and then architect the practical 'how', and I lead teams with the same clarity I bring to systems.

I am seeking a senior design role where this synthesis — creative mastery, enterprise-tech fluency and structured execution — can serve a global team. I am globally mobile: prepared to relocate wherever the right role is, with documents and readiness that support an immediate transition. My work is easiest to judge by seeing it: fim-designs.com.

I would welcome the opportunity to discuss how my background could strengthen your team.

Sincerely,

**Faysal I. Malik**
