01 PROFILE

Design leader with 15+ years across UI/UX and customer-experience strategy, design systems, brand identity and 3D architectural visualization — delivered for enterprises in Pakistan, the UAE and international remote engagements. I pair hands-on craft with enterprise fluency (SAP Fiori/UI5, Cloud ALM) and an AI-native practice, and I lead teams the way I design: with clarity, systems thinking and care. I make complex technology feel human.
